Museum Acquires Kennedy Death Car

DEARBORN, Mich., May 4 (UPI)— The limousine in which President John F. Kennedy was riding when he was assassinated in Dallas on Nov. 22, 1963, has been acquired by the Henry Ford Museum, it was announced Wednesday.

Museum officials said that it had been decided to preserve the 1961 Lincoln in long-term storage. It will not be shown in the immediate future or in the adolescent years of the Kennedy children, the officials said. The decision was made based on "the tragedy associated with this car," a museum statement said. NY Times 5-6-77
